EDUCATION

B.E. in Computer Science and Engineering (AIML). JSS Academy of Technical Education, Bengaluru. CGPA: 8.6.	Aug 2022 – Jun 2026
10th Grade (ICSE). Sri R.V. School, Kolar. Score: 95.20%.	Apr 2019 – Apr 2020
12th / Pre-University Course (PUC). Vidya Jyothi PU College, Kolar. Score: 89.67%.	May 2020 – May 2022

SKILLS

Languages :	Java, Python.
Core Concepts :	DSA, OOP, DBMS, OS, Computer Networks.
Web Development :	JavaScript, HTML, CSS, React.js, Node.js, Express.js, REST APIs, JWT Auth.
Databases :	MongoDB, MySQL, CRUD, Schema Design, Indexing.
AI/ML :	TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, XGBoost, Prophet.
LLM Tools :	Llama 3.1, LangChain, Groq API, Prompt Engineering, RAG.
Tools :	Git, GitHub, Docker, Postman, Streamlit, Firebase, VS Code.
Soft Skills :	Problem-solving, Communication, Collaboration.

EXPERIENCE

Android App Development Intern – MindMatrix - Integrated GenAI APIs to enhance user interaction in Android applications. - Improved performance by optimizing API calls and modularizing features.	Feb 2026 – May 2026
---	---------------------

PROJECTS

AI Candidate Ranking System - Built a scalable AI candidate ranking system that processed 100K+ profiles using JSONL streaming. - Developed a hybrid scoring algorithm for skill, experience, and semantic matching using a Top-100 Min-Heap.	Jul 2026
Resume Screener Agent - Developed an AI-powered resume screening system using Llama 3.1, Groq API, and Streamlit. - Automated resume parsing, job description matching, candidate scoring, and personalized feedback generation.	View App Jan 2026 – Jul 2026
Sales Forecasting Dashboard - Built an interactive Streamlit dashboard for sales forecasting using Prophet, SARIMA, and XGBoost. - Compared models using MAE, RMSE, and MAPE with interactive visualizations and future sales predictions.	View App June 2026
Skin Cancer Detection using Federated Learning & Blockchain - Developed a privacy-preserving skin cancer detection system using Federated Learning and Blockchain. - Simulated decentralized model training to ensure secure model updates without sharing patient data.	Jan 2025 – Apr 2025
Smart Traffic Management System - Developed an AI-based traffic management system using YOLOv3 and OpenCV for real-time vehicle detection. - Optimized traffic signal timing based on vehicle density to improve traffic flow.	Nov 2024 – Dec 2024

CERTIFICATIONS

Machine Learning Specialization - Stanford University and DeepLearning.AI	Mar 2025 – Apr 2025
Alpha (DSA with Java) - Apna College	May 2024 – Mar 2026
Python for Data Science, AI & Development - IBM	Jun 2024 – Jul 2024
Foundations of Cybersecurity - Google	Apr 2024 – Jul 2024
Google AI Essentials - Google	Apr 2023 – Jul 2023
